milling machine

The range of widcnc equipment was developed to efficiently meet the market demands for milling machines. We develop a range of robust, reliable and technologically advanced equipment with extremely favourable conditions.

Dimensions (L x W x H): 3560 x 2240 x 1640 mm

Weight: 1500 kg

Electricity: 380 V 3-phase AC 50/60 Hz 15A

Maximum moving speed: up to 25 m/m

Best milling cutters in the market

We have a full range of CNC machines capable of responding to market demands.

Easy to use software

User-friendly software with powerful tools, suitable for beginners or professionals.

Endless applications

Cut and engrave several materials.

First class materials

We guarantee reliable, robust and accurate machines.

main specifications

- Vacuum table with 6 independent areas
- Vacuum pump 5.5 kw
- Work space 1500 x 3000 mm
- Z axis height up to 200 mm
- X/Y movement: Pinion and rack
- Z movement: endless screw
- Stepper motors
- Air cooled spindle power 4.5 kw
- Double bag vacuuming 3.5 kw
- Structure with welded beams
- Machine lubrication system – manual
- ArtCAM software – 1 year licence
- Control system: NC Studio
- USB/network connectivity

optional

- Italian spindle and different powers
- Servo motors
- ATC – Automatic tool change
- Mist Cooling – Milling cutter cooling
- Automatic machine lubrication
