L300

laminator

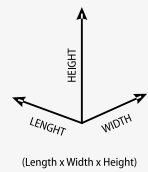

The range of widlaminator equipment was developed to efficiently and economically meet the market demands. We develop a range of robust, reliable and technologically advanced equipment with extremely favourable conditions.

Dimensions (W x L x H): : 2100 x 650 x 1350 mm

Weight: 210 kg

Power: 230v 16A

Maximum width: 1620 mm

Best laminators in the market

We have a full range of laminators available through partnerships with the best brands in the market.

First class materials

Thanks to the intelligent and robust laminator design, we guarantee reliability, precision and robustness.

main specifications

- Maximum width 1620 mm
- Silicon rollers with 130 mm diameter
- Maximum thickness 25 mm
- Up to 7 m/minute speed
- Manual and automatic laminating mode
- Included silent compressor
- Hand security sensor
- Vertical slicing blades

heating

- Top roller heating up to 60°C
- Temperature control in 1°C increments
- Heating time up to 15 minutes
- Infrared heating

operation

- Independent adjustment of support tension
- Pneumatic roller elevation system
- Quick roller fasteners
- Roller for collecting laminated supports
- Language: PT, ES and EN
